

GH401

Wireless gaming headphone with detachable microphone and noise cancelling feature

2.0 Stereo

With 2.0 Stereo, our AOC headphones create multidimensional sounds that amplify the immersion while gaming. Stereo means the audio “surrounds” the listener instead of coming from only one source. 2.0 refers to two separate channels: a left and a right one which add up to a sound experience from two separate directions.

50mm drivers

Our AOC headphones come with 50mm drivers. The driver is a round piece in the ear-part of a headset that creates the sound you hear – basically a tiny speaker. A large driver allows for a richer sound with more intense and cleaner bass. A diameter of 50mm is on the bigger end of the spectrum, meaning you will get top audio quality.

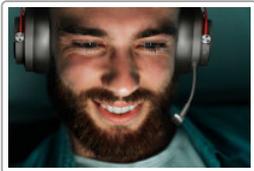

Double Connectors

Two types of connectors ensure that you can use your new headphones at any time. The 2.4 GHz band makes it simple to connect the product with your PC or PlayStation. If the battery runs out, you can quickly plug your headphones in thanks to the universal 3.5mm headphone jack, which also works for phone or Xbox.

Adjustable steel slider headband

Our AOC headsets are guaranteed to fit – no matter the size of your head, or if you wear a cap underneath or have glasses. The steel slider headband lets you adjust your headset quickly and is ensured to stay in place and stay comfortable throughout your gaming sessions.

Boom microphone

Thanks to the detachable microphone, you are always ready to communicate with your team-mates. The mic records omnidirectional, meaning it gathers sound waves from any direction so you can always be heard. The sensitivity and frequency range are set so only your voice gets recorded with maximum clarity while ignoring any noise in the background.

Leatherette protein with memory foam and metal mesh cover

Headphones need to have a great audio, be comfortable and look stylish. The faux leather with a memory foam padding ensures that you can wear your headphones in comfort. They don't pinch, even when keeping them on for hours in a long gaming-session. The metal mesh covers on the sides protect your new peripheral so you can safely transport it without any worries.

2.0 Stereo

With 2.0 Stereo, our AOC headphones create multidimensional sounds that amplify the immersion while gaming. Stereo means the audio “surrounds” the listener instead of coming from only one source. 2.0 refers to two separate channels: a left and a right one which add up to a sound experience from two separate directions.

3.5mm Audio connection

Two meters of cable and a universal 3.5mm audio connection allow you to connect your new headphone with any console or computer, and also to your phone if you want to play games or listen to music on the go.
